PC REQUIREMENTS (minimum)
For 1 to 8 ports virtually any pc old or new. For 9 to 19 ports a Dual Core pc and for 20 to 32 ports a Quad Core pc is recommended. 1 GB RAM (1 to 8 ports). For 9 to 32 ports 4 GB RAM recommended. 5 GB free Hard Drive space will hold 200 hours of dictation. USB 1.1 or USB 2.0 Port (recommended for 9 to 32 ports).

WINDOWS OPERATING SYSTEMS (64-Bit or 32-Bit)
Win 7, Server 2008/2003, XP, Vista, Win 2000

TELEPHONE LINES
Analog phone lines. RJ11 Phone cords included. Ask your phone company to enable "Disconnect Supervision" and to place your phone lines into a "Rollover Group".

USERS
2000 users, each with individual custom settings. Enter each user's name, assign each user a PIN Number and an optional Password, and they're ready to call in !

DICTATION FILES
Each user's dictation files are sent to the path chosen in their profile, or based upon the optional work-type they entered. File names include User Identity, date and time of dictation, Department number (up to 2 digits), Worktype number (up to 2 digits), Reference number (up to 15 digits), Priority indication, and a unique File Number.

REPORT GENERATION OPTION via ReportGenie
History and estimated billing reports can be generated based upon a wide variety of criteria... by User, by Department, by Worktype, by date range, and more!

FTP FILE TRANSER OPTION via FTPMagic
Dictation files can be transferred automatically to up to 300 FTP Folders to send files to remote transcriptionists.

TRANSCRIPTION OPTION via DigiScribe
Our **DigiScribe** Transcription System is the recommended companion for your DigiTel System. It accesses dictation files directly from DigiTel, or from up to 25 FTP Folders.

TOUCH-TONES
DTMF digits 0 - 9, *, #, and A, B, C, D let you control your dictation from any Phone or any Dictate Station.

HANG-UP DETECTION
Simply hang-up the Phone, or press *

AUDIO LEVELS
Each User's and each Line's Record Gain can be set to adjust the record level to compensate for soft-spoken users or quite phone lines.

AUDIO ENCODING MODES (For DigiScribe use WAV)
WAV u-Law, 8 bits at 8 KHz. = 64kb/s. (0.5 MB per minute)
VOX 8 bits at 4 KHz = 32 kb/s. (0.25 MB per minute)

RING DETECTION
Answers on the 1st ring, by default. Can be set to answer on 2 or more rings to allow the capture of Caller-ID.

DigiTel System Specifications

You can see who's dictating on your DigiTel System at a glance!

The instant a dictation is done, it is Immediately available for transcription!

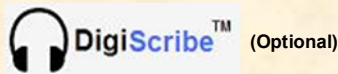

Up to eight DigiTel Systems can be used on one PC to allow up to 32 users to dictate simultaneously !

The number of phone lines (1 to 32) connected to your DigiTel System equates to the number of Users that can Call-In and Dictate simultaneously.
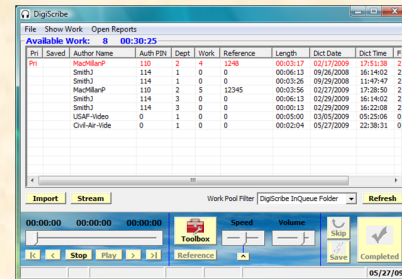

The 1-Line System can handle a 2nd line, and a 3-Line System can handle a 4th line with a simple License Key upgrade.

Up to 2000 users can be enrolled to dictate into your DigiTel System, each with their own custom settings !
Simply assign each user a PIN Number to Log-In with, and they're ready to Call-In and Dictate !
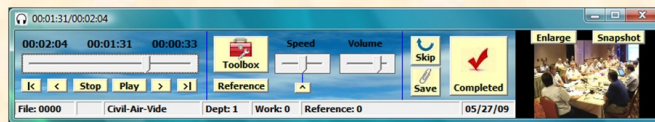

DigiScribe (Optional)

DigiScribe lets your transcriptionist access work locally, across a network, and from FTP Folders!

DigiScribe gives your transcriptionist the power to intelligently select work, manage their workflow, and foot pedal control of high fidelity playback!
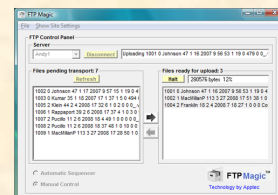

And DigiScribe transcribes video files and audio files from handheld Recorders too!

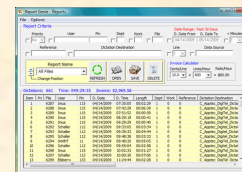

FTP Magic (Optional)

FTP Folders provide the perfect way to send work to remote transcriptionists, and to send typed work to your Clients!

Our FTP Folders are rented at less than 33^{c} per day!

ReportGenie (Optional)

ReportGenie lets you created Work History and estimated billing Reports.

DigiAlert (Optional)

DigiAlert notifies you and your remote transcriptionists (via email and text messaging) when new dictations are ready!
And it can notify your clients when their typed work is ready!

Let us show you how easily the system will benefit you with a FREE LIVE DEMO !
